Supplemental household biographical information

What is the highest level of education completed by your ? Master's degree (MA, MS)

If you have more than one parent/guardian with differing levels of education, please choose the highest level achieved overall.parent(s) or guardian(s)

What is the most recent occupation of your parent(s) or guardian(s)? Laborer

What was the primary language spoken in your childhood home? English

Have you ever been responsible for providing significant and continuing financial or supervisory support for someone else? If yes, please choose from the following: Sibling

Gender identity and sexual orientation

Personal background (continued)

What is your gender identity?	Cisgender Male
What is your sexual orientation?	Heterosexual
What are your personal pronouns?	He/him/his

Additional information

Full name of spouse, partner or significant other:	Natalie Wilson Greenwalt
Is your spouse, partner or significant other applying to the Kellogg Full-Time MBA program this year?	No

Employment history

Form Title	Employment history
Years of full-time work experience (upon matriculation, excludes internships):	3.5
Do you currently have an active role in a family business?	No
Please upload your resume:	Uploaded 09/11/2024
Have you worked in the United States or an English-speaking country for two consecutive years within the last five years?	Yes
Financial sponsorship	
Will you be receiving any financial support from your employer (not GI Bill)?	No
Career goals	
Industry desired after Kellogg	Medical Devices
Functional area desired after Kellogg	Brand/Product Management
Share with us the motivations behind your desired industry/function after graduating from Kellogg.	My father struggled with personality disorders after a series of mini-strokes. His effect on my childhood sparked my determination to create medical technologies for neurological conditions. At Dexcom, I used my skills to help diabetes patients and now aim to transition into product management. At Kellogg, I plan to gain the tools to make an impact in healthcare, first as a product manager and then by launching a neurotechnology venture.
What does a successful career look like five years after you graduate from Kellogg?	I will lead a team of product managers and manage a portfolio of products myself. I will have come up with a product idea and taken that idea to market. At this point in my career, I'm beginning preparations to transition into entrepreneurship.
Military experience	
Have you ever served in the military or armed forces?	No

Education

Form Title	Education
Institutions	
I am a first generation college student. My parent/guardian has not completed a bachelor-level degree (regardless of citizenship/location).	No

Essays

Essay 1

by articulating your motivations for pursuing an MBA, the specific goals you aim to achieve, and why you believe now is the right moment. Moreover, share why you feel Kellogg is best suited to serve as a catalyst for your career aspirations and what you w

At 18, I sat in the lobby of a psychiatry clinic and watched as firefighters entered the building and escorted my dad to be involuntarily committed to a psychiatric institution. Healthcare professionals said that commitment was our only option. Years earlier, my dad suffered a series of mini-strokes that damaged critical areas of his brain, leaving him with a severe personality disorder. I felt helpless to fix my dad's situation. Having witnessed the pain my family endured due to my father's condition, I feel deeply that no one should ever have to experience such hardship. I am determined to develop groundbreaking medical technologies to alleviate the suffering of those affected by neurological conditions and deliver those technologies at scale.

Before joining Dexcom, I struggled to see how a computer scientist could improve people's health. However, I learned to use my skills to improve the health of people with diabetes. I built a platform to increase company engagement with millions of users worldwide, bringing more people to our life-saving therapies. For a time, I led my team of developers to realize my product manager's vision. I've gained enough technical and industry experience that I feel ready to use the Kellogg MBA to transition into product management in healthcare. As a product manager, I will leverage my technical abilities to amplify my impact on those affected by neurological disorders. Product management will prepare me to start a neurological technology venture.

At Kellogg, the Healthcare at Kellogg pathway will help me succeed as a product manager at a company such as Johnson & Johnson or Pfizer. The Healthcare Entrepreneurship track will equip me with the tools to start my medical technology company. In NUvention: Medical Innovation, I will help my teammates develop medical technology prototypes. In return, I will grow my expertise beyond product development and gain experience presenting ideas to real healthcare executives. In Medical Technology Financing and Commercialization, I will work with a real healthcare company, which will help me network into a position post-MBA.

Drawing from my experience at Dexcom conducting interviews to vet software engineer candidates, I can help my Entrepreneurship & Venture Capital Club classmates source the "builders" for their ideas. In the Healthcare Club, I want to lead a workshop on hiring practices for software engineers. At Dexcom, I spent about half of each software release cycle doing documentation and regulatory work. I decided to automate much of our regulatory process so we could spend more time creating value. In the Healthcare Club, I can teach my classmates how to maintain agile development while conforming to regulatory processes.

Essays (continued)

I look forward to joining the Kellogg MBA community and advancing my healthcare impact as a product manager.

Essay 2

Describe a specific professional experience where you had to make a difficult decision. Reflecting on this experience, identify the values that guided your decision-making process and how it impacted your leadership style. (450 words)

Please copy and past

At Dexcom, my supervisor solicited designs to make our platform compliant with various global data regulations. I proposed one design, and a senior engineer suggested one that I thought missed the mark in several critical technical areas. Our team would feel the ramifications of whichever design was chosen for years to come. After a week of debate, my supervisor proceeded with my senior engineer's design.

Rather than become frustrated because my supervisor didn't pick my solution, I knew I had to fully support the idea because I would be the only one implementing it. I decided I valued being a team player and having good team dynamics more than being right technically. So, to fully support the team's chosen plan, I decided I needed more insight into the underlying reasoning behind my senior engineer's design. I met with him to dig deeper into his logic and discovered that he had considered a bigger picture than I did. My solution was flawed because it created a dependency on other teams, likely reducing team agility. With that understanding, I felt more empowered to develop his solution.

In this situation, I sought to understand my senior engineer's choices when they initially did not make sense to me. We developed a mutual understanding, and I built a stronger working relationship by probing deeper into his reasoning. I learned we could disagree on technical points and still function well as a team. I helped to create a team dynamic that welcomes technical opposition while not taking anything personally. Initially, I thought my supervisor gave my senior engineer's solution precedence because he was my senior. However, by increasing my understanding of my senior engineer's rationale, I learned to value his experience and not become disgruntled. Now, I consciously try to avoid becoming defensive of my ideas. Instead, I seek first to understand the perspectives of others so that we can more effectively arrive at workable solutions.

Ironically, several months later, after I finished implementing the chosen solution, we gained new data that led my supervisor to decide to undo my work and implement my original idea. However, because I had previously helped foster an attitude of unity in my team, the team had no contention about making the reversal. We all understood that it's not engineers against each other; it's engineers against the problem. Technical implementations are more easily changed than team culture. As a leader, I will work to develop cultures of mutual respect and open collaboration so that the

Essays (continued)

organizations I lead will be more unified and productive.

Additional information	
We know that life is full of extenuating circumstances. Whether you want to explain gaps in work experience, your choice of recommenders, inconsistent or questionable academic performance or something else, you can use this section to briefly tell us anyth	<p>For my letters of recommendation, I report to Peter Ajemba, but Steven Lai oversees my day-to-day work in his role as team lead/supervisor. I listed Peter as my direct supervisor, but there may be some discrepancies in whether my recommenders list themselves as "current direct supervisor".</p> <p>My GMAT Quantitative percentile is lower than I would have liked, but I am confident that I will excel in Kellogg's rigorous program given my educational and professional background.</p> <p>For my associate's degree from Weber State University, my "major" was in General Studies. There was no dropdown option for that major, so I just selected "Computer Science".</p>

EXPERIENCE

DEXCOM, RESEARCH AND DEVELOPMENT (NASDAQ: DXCM) **FARMINGTON, UT**
Software Development Engineer II 11/2023 – present
Software Development Engineer I 12/2022 – 11/2023

Dexcom is an industry leader in glucose monitoring devices for diabetes management, having 2.3 million users globally and \$3.6B revenue FYE 2023.

- Led a team of four engineers to develop a software platform to facilitate marketing communications via mobile app messaging
 - o Increased new product adoption by 400% in a one-week period and accounted for 20% of new product adoption overall by launching a marketing campaign via my platform
 - o Increased feature velocity by persuading product management to invest more time in addressing critical architecture changes against pressure to develop new features
 - o Gained industry newsletter recognition for developing an innovative platform not found elsewhere in the medical devices industry
 - o Reduced software deployment process time by 90% by advising against using an in-house solution and instead taking ownership of the software deployment process
- Increased feature velocity by securing leadership approval to use a modern software language
- Decreased software feature go-to-market time by leading presentations on technical practices to ~60 R&D personnel, propagating adoption of the practices by other teams

RINCON RESEARCH CORPORATION **TUCSON, AZ**
Research/Scientist I 05/2022 – 12/2022

Rincon Research Corporation is a small company that contracts with the US Intelligence and Defense communities. My work responsibilities were top-secret, so I am limited in the detail I can discuss.

- Advised leaders on integrating novel computing technologies into current products by developing a software prototype and presenting findings to leadership
- Enhanced customer data analysis ability by building a system to gather data from various global sources to one centralized cloud-based location

EDUCATION

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN **URBANA, IL**
Master of Computer Science. GPA 3.87/4.0 2022-2023

BRIGHAM YOUNG UNIVERSITY **PROVO, UT**
Bachelor of Science in Computer Science, Minor in Business. Cum Laude. GPA 3.97/4.0 2020-2022

- Oak Ridge National Lab intern and BYU Human-centered Computing Lab research assistant
- Computer science teaching assistant; ~20 hours per week throughout the entire program

ADDITIONAL

- **Volunteer Missionary**, *The Church of Jesus Christ of Latter-day Saints* (2017-2019)
 - o Accelerated proselyting efforts by leading a team of 18 volunteers
- **Co-authored** a paper published in the world's largest technical professional organization (IEEE)
- **Eagle Scout Award Recipient**, *The Boy Scouts of America* (2012)

 This is not an official transcript. Courses which are in progress may also be included on this transcript.
